

Industrial Double Row Clothing Rack

List of Parts

Assembly

1. Lay pipe (A) with elbow fittings on floor.
2. Screw (B) pipes into each side of pipe (A).
3. Slide (E) pipe with oversized tee fittings over (B) pipes.
4. Screw (BL) pipes onto (B) pipes.
5. Screw (D) feet onto (BL) pipes. Tighten (D) feet so they are perpendicular to the rack.
6. Carefully rotate rack upright. Make sure oversized tee fittings on (E) pipe are resting on top of the coupler fittings on both (BL) pipes.
7. If needed, level the rack by tightening or loosening flange fittings on bottom of feet.

Enjoy!
